Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 9, 11, 13 and 22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 9, line 2; claim 11, line 2; and claim 13, line 2 recite the language "adapted to". This language makes it difficult to determine whether the structure actually performs this function or not.

Claim 22, line 15 recites the limitation "the character". There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 7-8, 15-26 and 29-32 are rejected under 35 U.S.C. 102(b) as being anticipated by Tillery et al (5,114,155).

Regarding claims 1-4, 7-8, 15-26 and 29-32, Tillery teaches a multi-media interactive play system that includes multiple play environments either within the same location or at various locations that allows a player to play a game and stores the player

identification information and game statistics on a player tracking card where the player tracking card can be used at various locations to let the system know the players performance and identification information (abstract; col. 2, lines 34-62; col. 4, lines 34-48).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5-6, 9-14 and 27-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tillery et al.

Regarding claims 5-6, 9-14 and 27-28, Tillery discloses all the limitations of the claims as discussed above. While Tillery teaches that the player cards may be any portable data storage device (col. 4, lines 34-35), Tillery does not explicitly state the use of a card with a magnetic stripe or a bar code. It is well known in the art to use magnetic cards to store data (credit cards, driver's license, etc.). Further, it is well known in the art to use bar code stickers to store information (stickers on labels of grocery products). Therefore it would have been obvious to a person of ordinary skill in the art at the time of the invention to employ magnetic cards or bar code stickers in the system of Tillery.

Pertinent Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Acres et al ('817), Walker et al ('648), Holch et al, and Fertitta III et al teach player tracking systems in network gaming environments.
